## **Boundary Values Analysis:**

6 <= Username <=14

6 <= Password <=14

| <b>Test Case</b> | Username          | Password        | Output   |
|------------------|-------------------|-----------------|----------|
| 1                | Paras_vag<br>hera | #Gojo2324       | Accepted |
| 2                | paras             | #sataru23<br>24 | Error    |

| 3 | Paras_vag<br>hera | #Gojo                | Error |
|---|-------------------|----------------------|-------|
| 4 | Paras_vag<br>hera | #GojoSato<br>ru12345 | Error |
| 5 | paras             | #GojoSato<br>ru12345 | Error |

## **Acceptance Level testing:**

| Test case | Test<br>Description | Expected   | Actual  |
|-----------|---------------------|--|---|
| 1         | Sign up             | 1) If username and email id are valid as well as password and confirm password are matched then you are able to go sign in page for login. | 1) When entered correct credentials user good to go for sign in page. |
|           |                     | 2) If username and email id are not valid and  | 2) when entered Wrong credentials user will not Sign in page.         |

|   |         | username is   |                |
|---|---------|---------------|----------------|
|   |         | not in given  |                |
|   |         | range as well |                |
|   |         | as password   |                |
|   |         | and confirm   |                |
|   |         | password      |                |
|   |         | not match     |                |
|   |         | then you are  |                |
|   |         | not able to   |                |
|   |         | go for sign   |                |
|   |         | in page.      |                |
|   |         |               |                |
|   |         |               |                |
| 2 | Sign in | 1) If         | 1) When        |
| _ | 3.9     | username      | entered        |
|   |         | and           | correct        |
|   |         | password      | credentials    |
|   |         | are valid you | user good to   |
|   |         | are able to   | go for         |
|   |         | access the    | homepage of    |
|   |         | homepage of   | the website.   |
|   |         | the website.  |                |
|   |         |               | 2) When        |
|   |         | 2) When       | entered        |
|   |         | username      | wrong          |
|   |         | and           | credentials    |
|   |         | password      | User not       |
|   |         | are not valid | allowed to     |
|   |         | you will      | access home    |
|   |         | notified with | page of the    |
|   |         | message       | website        |
